## Vigilant Solutions: LPR Analytics

### 1. BACKGROUND

The San Diego Sector Intelligence Unit's (SIU's) function with the Sector's scope of operations is to collect data from multiple sources, then target and analyze links to identify Transnational Criminal Organizations. Without data to feed into the system, the SIU cannot be effective at disrupting and dismantling the criminal element that operates in the San Diego Sector's Area of Operation. When considering the amount of vehicle traffic that passes through San Diego, and for that matter, through the Nation, the intelligence value of collecting and analyzing license plate reader data from various law enforcement entities is axiomatically necessary to help understand and develop an accurate threat picture.

### 2. SCOPE

This is a sole source acquisition due to lack of vendors that offer the specific service we are requesting. The subscription is specific to law enforcement and unique to the vendor that grants access to a nation-wide database of license plate reader data via a secure internet connection. We have conducted market research through Google and have been unable to locate another vendor that collects national license plate reader information, collates it in a database, and offers access to Law Enforcement Agencies through access to a data center. We have also requested names of other companies from Vigilant who handle the same type of service. There are other vendors that collect license plate reader (LPR) data, but all require the buyer to set up a stand-alone server to access the data. The vendor we have selected collects data into a secured data warehouse and allows access through a secured internet connection. Additionally, Vigilant Solutions has 2.8 billion LPR records which is much more robust than other vendors such as ELSAG, North America.

### 3. APPLICABLE DOCUMENTS

### 4. SPECIFIC TASKS

---

This service will grant access to a nation-wide database of license plate reader data via a secure web-based application and allow intelligence agents to analyze the movement of targeted vehicles as they travel on the nation's highways. **I.4 SPECIAL SECURITY REQUIREMENT - CONTRACTOR PRE-SCREENING (SEP 2011)**

1. Contractors requiring recurring access to Government facilities or access to sensitive but unclassified information and/or logical access to Information Technology (IT) resources shall verify minimal fitness requirements for all persons/candidates designated for employment under any Department of Security (DHS) contract by pre-screening the person /candidate prior to submitting the name for consideration to work on the contract. Pre-screening the candidate ensures that minimum fitness requirements are considered and mitigates the burden of DHS having to conduct background investigations on objectionable candidates. The Contractor shall submit only those candidates that have not had a felony conviction within the past 36 months or illegal drug use within the past 12 months from the date of submission of their name as a candidate to perform work under this contract. Contractors are required to flow this requirement down to subcontractors. Pre-screening involves contractors and subcontractors reviewing:
  - a. Felony convictions within the past 36 months. An acceptable means of obtaining information on felony convictions is from public records, free of charge, or from the National Crime Information Center (NCIC).
  - b. Illegal drug use within the past 12 months. An acceptable means of obtaining information related to drug use is through employee self certification, by public records check; or if the contractor or subcontractor already has drug testing in place. There is no requirement for contractors and/or subcontractors to initiate a drug testing program if they do not have one already in place.

- c. Misconduct such as criminal activity on the job relating to fraud or theft within the past 12 months. An acceptable means of obtaining information related to misconduct is through employee self certification, by public records check, or other reference checks conducted in the normal course of business.
- 2. Pre-screening shall be conducted within 15 business days after contract award. This requirement shall be placed in all subcontracts if the subcontractor requires routine physical access, access to sensitive but unclassified information, and/or logical access to IT resources. Failure to comply with the pre-screening requirement will result in the Contracting Officer taking the appropriate remedy.

**Definition:** *Logical Access* means providing an authorized user the ability to access one or more computer system resources such as a workstation, network, application, or database through automated tools. A logical access control system (LACS) requires validation of an individual identity through some mechanism such as a personal identification number (PIN), card, username and password, biometric, or other token. The system has the capability to assign different access privileges to different persons depending on their roles and responsibilities in an organization.
